## Your ClimateChoice Score Breakdown

### Emissions Calculation

The Emissions Calculation category reflects the availability and quality of climate-related emissions data at a company and product-level.

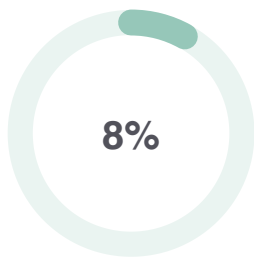

- ✓ Have the Scope 1 and Scope 2 emissions been calculated for the last year?
- ✓ Have the Scope 3 emissions been calculated for the last year?
- ✓ Have the Scope 3 emissions for the last year been broken down into different categories?
- Is PCF data available?
- ✓ Is the emission intensity reported?

## Strategy & Control

The Strategy & Control category reflects the strategic alignment and management oversight needed to steer a company's Climate transition successfully.

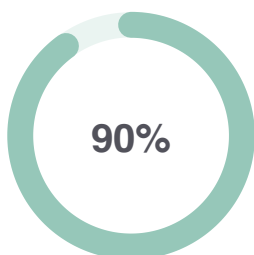

- ✓ Is there a climate transition plan?
- Is money specifically made available for climate action?

## Climate Targets

The Climate Targets category reflects the presence and quality of specific climate targets, both long- and near-term.

- Is a Scope 1 and Scope 2 target currently underway?
- Is a Scope 3 target currently underway?
- ✗ Are the climate targets compatible with 1.5°C?
- ✗ Are the climate targets validated by SBTi?
- ✗ Is a Net Zero target currently underway?

## Decarbonization Measures

The Decarbonization Measures category reflects the operational actions in past, present and future timeframes that have an impact on emissions.

## Emissions Performance

The Emissions Performance category reflects the draw-down of emissions over time.

- ✓ Are Scope 1 and Scope 2 emissions decreasing?
- ✓ Are Scope 3 emissions decreasing?
- ✓ Have the company's total emissions decreased?
